Mr. James Steffensen
Ehlersvej 8
Hellerup
Denmark

Dear OM:

Many thanks for yours of December 12th, containing the interesting dope about your transmitter. The only fly in the ointment is that you are on 105 meters when you might just as well be reaching out a little further on 80 or 90. Of course most of us who are fishing for European DX do go up as high as 105 or 110 ordinarily but there are a whole lot whose tuners merely cover the US short wave band of 75 to 80 and a little bit above. This would take in most of the Britishers but not necessarily some of the other countries who use 100 meters and over.

Migosh, but hasn't 2NM the prize fist? I don't know why somebody doesn't tip him off and diplomatically suggest that he send carefully. He is an awfully good scout and I wouldn't like to hurt his feelings but I certainly do wish that he would learn to send decent code.

So long, OM, and if anything comes of the letters written the Telegraph Department let me know. Thanks for your Christmas wishes and the gang heartily reciprocates. Hope to be QSO, 7QF soon.

Yours sincerely,

C. A. Service, Jr.,
Assistant Secretary
